Professional Summary

Full Stack Developer with 2+ years of professional experience building scalable enterprise SaaS applications using Laravel, PHP, React.js, JavaScript, and MySQL.

I enjoy solving complex backend challenges—from designing scalable REST APIs and optimizing database performance to building intuitive React interfaces. My work focuses on writing clean, maintainable code that improves product reliability, developer productivity, and user experience.

At ConcettoLabs, I've contributed to HRMS, Payroll, CRM, Attendance, Project Management, Lead Management, and Biometric Integration products serving 500+ users. I've developed 50+ production APIs, improved API response times by 40–50%, migrated applications from Laravel 9 to Laravel 12, and resolved more than 4,000 PHPStan issues to strengthen long-term code quality.

I thrive in collaborative Agile teams and enjoy taking ownership of features from requirement gathering through deployment and post-release optimization.

Professional Experience

Junior Software Engineer, ConcettoLabs

01/2024 – Present
Ahmedabad

Working as a Full Stack Developer within a 4-member Agile team, building enterprise HRMS and CRM products used by 500+ users. Selected Contributions

- Improved backend API performance by 40–50% through query optimization, efficient Eloquent usage, indexing strategies, and business logic refactoring.
- Designed and developed 50+ RESTful APIs supporting HRMS, Attendance, Payroll, CRM, Employee Management, and Lead workflows.
- Successfully migrated a large production application from Laravel 9 to Laravel 12, updating deprecated functionality while maintaining backward compatibility.
- Eliminated PHPStan/Larastan issues, improving maintainability, static analysis compliance, and long-term code quality.
- Built the complete Lead Management Module, including lead lifecycle management, import/export, pipeline tracking, Kanban workflows, filtering, and CRM automation.
- Developed a Biometric Attendance Integration for synchronizing employee attendance records from biometric devices into the HRMS platform.
- Contributed to the development of the Payroll Module, implementing payroll calculations, validation rules, and backend workflows.
- Customized HubSpot CRM integrations based on client-specific business requirements.
- Refactored legacy code into reusable service-based architecture, improving readability, scalability, and testing.
- Participated in production deployments, debugging, client issue resolution, and continuous product enhancement.

Education

Bachelor of Engineering (B.E.), Hashmukh Goswami College of Engineering (GTU)

2023

CGPA: 7.99 / 10

Core Technical Skills

Languages

PHP, JavaScript (ES6+), HTML5, CSS3

Frontend

React.js, Redux, React Hooks, Formik, React Quill, Bootstrap

Cloud & Tools

AWS S3, Git, GitHub, Postman, Composer, PHPStan, Larastan, VS Code, Cursor AI, Claude AI

Backend

Laravel, REST APIs, Authentication & Authorization, Service Layer Architecture, Repository Pattern, MVC, Queue Jobs, File Storage, Third-Party Integrations

Database

MySQL, Eloquent ORM, Query Optimization, Database Design

Languages

- English
- Hindi
- Gujarati

Project Highlights

Enterprise HRMS Platform

Developed multiple business-critical modules including:

- Employee Management
- Attendance
- Leave Management
- Payroll
- Project Management

Technology Stack: Laravel • React.js • MySQL • REST APIs

Lead Management & CRM Platform

Designed and implemented end-to-end lead lifecycle functionality with advanced filtering, pipeline management, Kanban workflows, import/export, and CRM integrations. Technology Stack: Laravel • React.js • MySQL

Biometric Attendance Integration

Built a plugin that synchronizes attendance data from biometric devices directly into the HRMS system, reducing manual effort and improving attendance accuracy. Technology Stack: NodeJS • MySQL • MSSQL

Key Achievements

- Improved API response time by 40–50%.
- Built 50+ production-grade REST APIs.
- Migrated enterprise applications from Laravel 9 to Laravel 12.
- Resolved 4,000+ PHPStan/Larastan issues.
- Built Lead Management, Payroll, Kanban Board, and Biometric Integration modules.
- Delivered software supporting 500+ active users.
- Collaborated within a 4-member Agile engineering team.
